

Dear Colleague,

Thank you for requesting a copy of the Apple® CD-ROM "Support Sampler," which contains the latest hits of Apple, Microsoft, Farallon, SuperMac, and Letraset.

Your disc is enclosed with the following:

- AppleCD SC® product literature
- Information on a new Apple CD-ROM disc, *The Technical Information Source*
- CD-ROM product information from Farallon, Letraset, and Microsoft
- A list of third party CD-ROM titles

Although you can insert the enclosed disc into an audio CD player and hear a summary of its contents narrated by Jean-Louis Gassée, there's no substitute for hands-on experience with an AppleCD SC. Which is why we urge you to get a demonstration of the disc at your nearest authorized Apple reseller.

Once you've actually experienced the AppleCD SC for yourself, you'll understand why the list of Macintosh® CD-ROM titles is growing so quickly. For example, some of the most popular Macintosh applications are on CD-ROM right now; they include on-line documentation, audio-visual tutorials, third-party utilities, and resources — *everything you need to get up and running on one compact disc*.

Or imagine learning about Beethoven's life, musical architecture, the classical orchestra, and much more while listening to the Ninth Symphony. If you are a Mozart aficionado, sit tight, because *The Magic Flute* is also on CD-ROM.

That's what's possible when you have over 600 megabytes of text, graphics, and audio information right at your desktop. And there is no need to wait, as these are just a few of the titles currently available for the AppleCD SC.

Don't think there's a CD-ROM for you? Then you need to review the enclosed list. Or better yet,

(over, please)

pick up the phone, give your authorized Apple reseller a call and get a demonstration of the AppleCD SC, "Support Sampler" CD-ROM and much more!

To find the Apple reseller nearest you, call 800-441-3001, ext. 400.

Again, we'd like to thank you for your interest. And welcome you to CD-ROM.

Sincerely,

Apple Computer, Inc.

PS. In addition to previews of new CD-ROM software products, the enclosed CD-ROM disc contains a sample of an exciting new Macintosh support tool, *The Technical Information Source*. This is just a sample. The complete set of support tools is contained on *The Technical Information Source* CD-ROM disc that is now available. For more information on this exciting new support product, be sure to check the enclosed product specification sheet. Or ask your Apple reseller.
